

Simple Metal Etching Jacqueline Sullivan @ Whispering Woodlands

You'll be amazed when you find out how easy it is to etch a design in metal! We'll work with rubber stamps and xerox transfer on brass and copper to create etched metal pieces that are works of art in themselves! In addition, you can draw or letter on the metal and then etch it to create something completely original. Panels that you make will be good for book covers, embellishments for books, cards, and collages. We'll do some simple patinas on the metal to enhance the designs. You'll be able to complete several pieces in class. The supplies are simple and readily available and so you will be able to continue your metal play on your own at home.

Student Supply List:

Your favorite Rubber stamps that will fit inside a 2" square (deeply etched stamps with somewhat simple designs work best.)

Packing tape

Water container the size of a one lb. cottage cheese container

Rubber gloves

Apron

Black Sta-Zon stamp pad (must be Stazon brand)

Sharpie markers in various sizes (must be sharpie brand)

Ideas for direct drawing
